

THE BIGGEST SHARK IN THE OCEAN

WHALE SHARK

www.sharkguardian.org

Whale sharks are one of the three **filter-feeding** sharks,

along with **basking shark** and **megamouth shark**!

That means they only 'hunt' by opening their big mouths...

and filtering plankton straight out of the water!

FUN FACT:
Whale sharks are worshipped in Vietnam as 'Lord Fish'

Unlike other big sharks, this mama gives birth to **hundreds of babies**,

each one only **45cm** long!
